ABOUT LUGER RESEARCH

LUGER RESEARCH

Institute for Innovation & Technology

Luger Research, with its headquarters in Austria, is a media, events and research organization that supports the global lighting area by sharing information about trends, designs and technologies for future lighting solutions.

Luger Research fosters a global understanding of future lighting solutions and serves the lighting industry and lighting design communities. They do this by raising awareness, communicating and supporting the lighting industry and research, and by facilitating partnerships. This enables lighting technologies and trends to contribute to sustainability and well-being, for a better future.

Founded in 2001 with a focus on research and consulting, Luger Research has grown and developed over the last 20 years. The LED professional publications were launched in 2006. In 2011 the LED professional Symposium +Expo was introduced, and in 2017 the Trends in Lighting Blog and Event joined the company's portfolio. The Global Lighting Directory was first published in 2019. In 2020, LpS Digital replaced the LpS Live event with the world's first digital lighting conference and exhibition.

Today, Luger Research cooperates with multiple lighting organizations, scientific associates and event and media partners around the globe and operates a scientific network in the light sector (SciPiL).

Media

The LED professional publications form the global communication hub for lighting technologies and lighting design. It is comprised of LED professional Review, the LED professional Newsletter, LED professional Online and, the recently launched Trends in Lighting Blog. Affiliated to the network are multiple social media channels serving the international lighting industries and research organizations with up-to-date news and features.

LED professional has over 30,000 subscribers, more than 220,000 page-views per month and social media platforms with followers in excess of 23,000. It is the world's leading publication and platform in the field of Solid-State-Lighting technology and design information.

The Trends in Lighting Blog is dedicated to reporting on creative, inspirational and impactful uses of light. The TiL Blog shares and explores the potential of light, through interviews, case studies and product and application news articles. The core focus areas are Illuminating Spaces, Mobility, Life & Wellbeing and Light Experiences, wherever light influences life. The TiL Blog has over 14,000 subscribers, more than 3,000 unique page-views per month and a growing number of social media followers from around the world.

The Global Lighting Directory (GLD) covers the full value chain in lighting, addressing architecture, lighting design and industry experts. It features LinkedIn profiles, reference projects, and enhanced opportunities for highlighting entries.

“Today’s marketing realities dictate that companies spend money only where they get results; Cree is no exception. This is why we can say that advertising with LED professional, in their magazine, online and in the LED professional newsletter, is money well spent.”

CREE

Events

The on-demand LpS Digital conference and exhibition brings current, high-quality content about light, light quality, lighting technologies, design, and applications to the entire global lighting community and acquaints the lighting domain with the latest product developments and applications trends. Hence, LpS Digital is aiming at all stakeholders: manufacturers of components, systems, software, peripherals, etc., as well as lighting designers/architects.

Due to environmental issues and travel restrictions, the acclaimed LpS Symposium +Expo and Trends in Lighting Forum &Show, organized by Luger Research and held in Bregenz, Austria, had to be remodeled and integrated into the LpS Digital in February 2020. This unique event was the first of its kind in the industry and is available to viewers 24 hours a day, 7 days a week.

LpS Digital follows the motto: “Experience the Future of Light.”

Research & Consulting

Luger Research has been providing research, innovation and technology consulting services on various lighting technology topics since 2001. The services range from engineering to IP and technology reviews, including trend, risk and patent analyses. Luger Research is also a knowledge and dissemination partner in various EU partner projects. Luger Research founded the Scientific Partnership in Lighting. SciPiL connects research organizations and the lighting industry, enabling knowledge sharing that triggers the development of vital innovations in the lighting domain. Research needs external input to continue its essential work. Industry can only thrive when it has access to the latest scientific findings. The SciPiL recognizes the need to build partnerships that will create an information exchange and collaboration, creating new possibilities for both researchers and industries in lighting.

The Global Communication Hub for Lighting Technologies and Design

LED professional is the comprehensive B2B publication and platform for latest lighting technologies and design, connecting readers related to design, engineering, testing and production from around the world.

LED professional Review (LpR)

- The established authority when it comes to LED & OLED technology information
- Circulated to more than 30,000 people from the lighting industry throughout the world. **NEW:** Circulated to more than 15,000 people from the lighting design community throughout the world.
- The essential marketing tool used by decision makers in the lighting area helps generate valuable sales leads
- Published bimonthly for a solidly growing reader audience comprised of engineers & researchers, executives & corporate management, and many others

LED professional Online (LpO)

- One of the most trusted online portals for all aspects of design, engineering and the application of Solid-State-Lighting and general LED & OLED technologies, worldwide
- Has in excess of 220k page-views per month
- The perfect supplement to the more extensive technical articles in the LED professional Review (LpR)
- Has company information available in a well structured Buyer's Guide
- Showcase for products and services to the right audience the world over
- Generates traffic to advertisers' websites 24/7
- Designed to make it easy to access important information quickly

LED professional Newsletter (LpN)

- Delivers information and breaking news on cutting edge technologies and the latest product and application reviews twice monthly
- Reaches an audience of over 29,000 subscribers who can get the latest information by simply opening an email
- Reaches a targeted, opt-in audience that wants to see it
- Effective way to generate new contacts and leads
- Allows for coinciding ads with upcoming events or product releases

AUDIENCE

Organizations

NEW:

As of January 2022, the LED professional Review (LpR) will expand the editorial content to include light and lighting design aspects alongside the technological focal points. The goal is to share knowledge across boundaries and link up experts in the field of light to broaden impulses on lighting solutions.

Starting with the January/February 2022 issue, the LED professional Review (LpR) will be sent to lighting designers and lighting architects in addition to our regular readers. For more information about this additional spread, please read the section "Trends in Lighting" on page 21.

Introduction of On-BBL Tunable White Technology

By introducing tunable white technology with a combination of warm white LEDs and cool white LEDs, the chromaticity point moves from the blue chromaticity diagram, with the classic focus (BBL) is moved. Due to the consistency of the BBL, especially under 3000K CCT, the emission color relationship between "warm" and "cool" color range will adjust to the emission color, and it is expected to expand the range of correlated color temperature (CCT) toward 2000K CCT. PLEXIGLAS, Managing Director at OSRAM Lighting Solutions, introduces a new "On-BBL, Tunable White" technology that makes the chromaticity point draw an upward curve along the BBL, to 2-chromatic control. This technology expands the possibilities of tunable white LEDs by allowing the CCT range to be set from 2000K to 6500K.

Basics of Color Mixing

Light is a mixture of various colors. The color of light is determined by the spectral power distribution (SPD) of the light source. The SPD is a graph showing the relative intensity of each wavelength of light. The color of light is determined by the SPD. The SPD is a graph showing the relative intensity of each wavelength of light. The color of light is determined by the SPD. The SPD is a graph showing the relative intensity of each wavelength of light.

Light makes the Atmosphere. And PLEXIGLAS® makes the light.

Cover Corner Snipe Ad

The Cover Corner Snipe Ad is a triangular ad separated from the cover page by a thin white line. Basically, the same design rules are valid as for any regular ad. There are just a few relevant additional requirements due to the triangular shape.

Specifications

- Overall size: 86 x 86 mm
The lower right half of the triangle should be designed keeping bleed and live area requirements in mind
- The upper left side of the triangle MUST be transparent
Suitable file formats for this are PDF or TIFF
Color space is cmyk – PSO Uncoated v3 FOGRA52
- Bleed: 3mm resulting in an overall size of 80 x 80 mm
- Live Area Margin: 6mm, resulting in an overall live area of approx. 74 x 74mm whereby the upper left half is transparent and the lower right half contains the ad
- Choose either one web link or a link to an ad or article inside the magazine

Webinar Sponsorships

Showcase your technological leadership, increase brand awareness and reach prospective clients

LED professional webinars provide an effective platform to demonstrate thought leadership, engage with your target audience and drive crucial leads for business. LED professional's highly qualified audience guarantees superior leads that are essential for your success. Webinars are an exceedingly effective way to connect with prospective customers for the first time and intensify communication with your existing clients.

Webinars

Present background information or give a detailed overview of your technology and product innovations to the decision makers in leading companies. Broadcast and discuss your most up to date announcements. Invite an expert to give a presentation.

How it Works

Provide your own video for the Hosted Webinar Packages. For the Webinar Sponsorship Package, LED professional will facilitate the event which will be delivered on the GoToWebinar platform. LED professional provides its highly valued website and promotional capabilities to attract targeted sales leads. You provide the topic, content and panelists.

Your Benefits

LED professional Webinar sponsorship includes cross-media promotion on LpO, LpN email campaigns and in LpR. This intensive promotion can start up to 4 months before the event and continues through the 12 month period that the webinar is archived.

Sponsors receive detailed information of each webinar participant. This information includes full name, title, job-title, company name, address, email and phone number. On request, additional information can be gathered or customized questions can be included.

Sponsoring a Webinar demonstrates your innovative leadership skills to a committed, decision making audience.

The screenshot shows the LED professional website with a featured webinar announcement. The headline reads: "WEBINAR 'Faster to Light with Simpler Design: A New Multimode Flyback LED Solution'". Below the headline, there is a video player showing a person presenting in front of a city skyline at night. To the right of the video, there is a call to action: "Please register to view the webinar and to download the presentation file." and a "REGISTER NOW" button. The website also features various news items, a featured article about stray light correction, and logos for sponsors like Luminit, SHEENLY, SAMSUNG, and HONGLIHONG.

Hosted Webinar Package – 3 Months

- Hosted webinar on LpO (client provides video)
- LpN announcement: once a month (3 times in total)
- Lead generation for 3 months
- At the end of the 3 month period the webinar is archived for 1 year

USD 4,760

Hosted Webinar Package – 12 Months:

- Hosted webinar on LpO (client provides video)
- LpN announcement: once every 2nd month (6 times in total)
- Lead generation for 12 months
- At the end of the 12 month period the webinar is archived for 1 year

USD 7,780

Webinar Sponsorship Package – 12 Months:

- Recorded live webinar (approx. 45 min.) moderated and hosted by LED professional
- One E-mail blast in advance
- LpN E-newsletter Ad - in 2 issues (pre) and 1 issue (post)
- LpR magazine Spotlight Ad - in 1 issue (pre) and 2 issues (post)
- LpO online banner - 150px (w) x 125px (h) - for 2 months (pre) and 2 months (post)
- Lead generation and reporting for 12 months
- Archived webinar for two years

Breakdown by Global Region

NEW:

As of January 2022, the LED professional Review (LpR) will expand the editorial content to include light and lighting design aspects alongside the technological focal points. The goal is to share knowledge across boundaries and link up experts in the field of light to broaden impulses on lighting solutions.

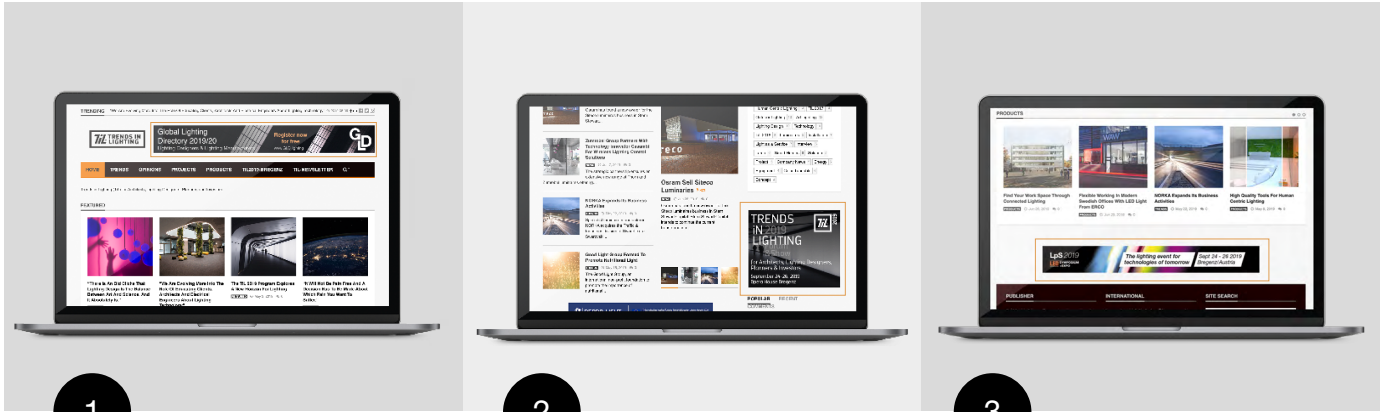

Starting with the January/February 2022 issue, the LED professional Review (LpR) will be sent to lighting designers and lighting architects in addition to our regular readers. For more information about this magazin spread, please read the section on page 7.

Numerous Opportunities

1. CONFERENCE | Lectures (Submitted and Invited)

As set out in the original roadmap for LpS/TiL events, authors will be informed whether or not their submission was accepted by the program management within two weeks of submission. If accepted, the lecture will be recorded by the LpS Digital management via Internet and the paper (if an agreement has been made) will either be published in a corresponding LpR or made available in the digital proceedings by end of the year. The video presentation will be published immediately upon completion.

A lecture can also be sponsored. These lectures will be labelled “sponsored”. The presentation is subject to the same criteria as a standard conference contribution in order to keep the quality of the presentations high.

Booking Option: “Sponsored Lecture“

Pricing:

USD 5,590
(shared to one channel Technology OR Design)

+25% for both channels
(Technology AND Design)

2. Exhibition (Virtual Booth)

The virtual exhibition is made up of videos published in the Exhibition section of the LpS Digital website and distributed through the technology and/or design tracks. The product presentation can take the form of an explanation, an interview or a virtual booth presentation.

The exhibitor package also includes one LpS Digital Connect meeting for direct contact with prospects.

Booking Option: “Virtual Product/Booth Presentation”

Pricing:

USD 5,590
(shared to one channel Technology OR Design)

+25% for both channels
(Technology AND Design)

3. LpS Digital – Connect / Live

LpS Digital Connect: “Almost like a real-live trade show” might be best to describe this most advanced version of a digital meeting related to the industry. A Connect Meeting is an integral part of a “virtual product/booth presentation”, thus available to every active LpS Digital exhibitor.

It enables the supplier to bring his product message across approaching prospects and customers in several modes such as confidential face-to-face, in a virtual booth, or in the open room, which provides space for max. 500 attendees.

Suppliers/attendees have the choice to whom to talk (or to whom not). All conversations take place in a protected setting and are in video format. The organizers are prepared to set up short demo meetings. The organizer will promote the Connect Meetings with its host, topics, and schedules through websites, newsletters, and social media. The organizers are taking charge of the opening and welcome notes and short briefings before unlocking the floor. LpS Connect is available on a global scale but can be scheduled in appropriate time slots for the Americas, Europe, and Asia due to the exhibitors/hosts needs.

LpS Digital Live is the annual summary event that includes a panel discussion or keynotes, the Best Paper/Best Product Award Ceremony, Trend views & outlook, and meet/greet/discuss opportunities with the lighting industry and design communities. For more information, please visit: www.LpS-Digital.global.

Numerous Opportunities

4. LpS Digital Sponsorships

The LpS Digital webpages can be branded with a 728x90 leader board banner. Each sponsor banner is limited in number and can be targeted for the Technology and/or Design tracks.

Sponsorship Options: Conference and Exhibition Branding

Home Page:
USD 10,600

Conference Page:
USD 5,100

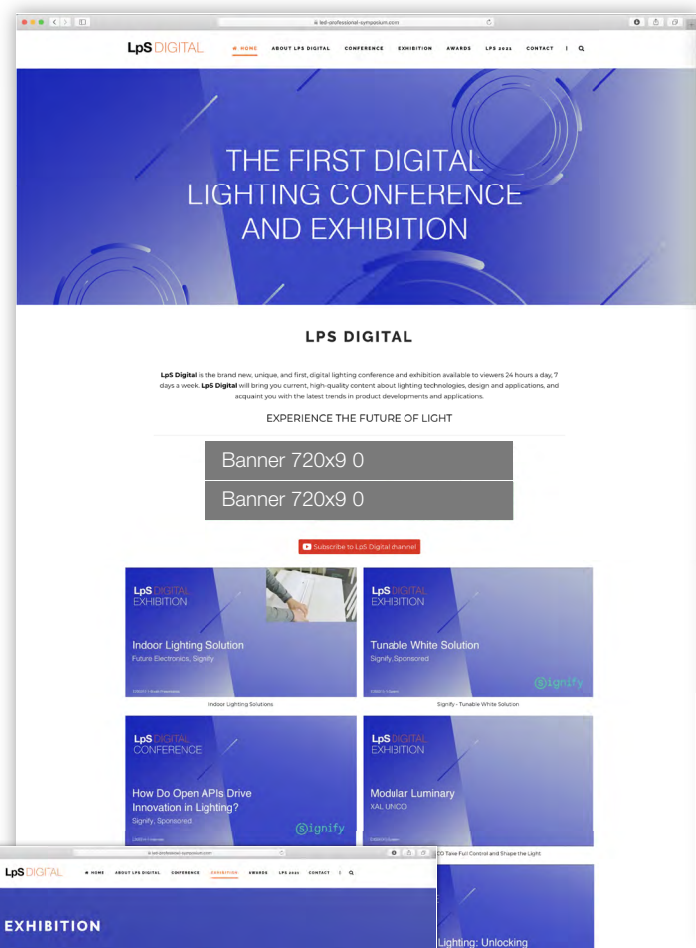

Exhibition Page:
USD 5,100

Section Page (e.g. IoT):
USD 3,200

Live-Stream (exclusive)
USD 5,100

Integrated Banner
USD 5,100

Integrated Logo
USD 2,490

All sponsored packages officially expire at the end of each calendar year. The further procedure for events after 2021 will be announced on the LpS Digital website.

General Information,
Publications & Distribution

The Global Lighting Directory (GLD) is a free publication that covers the full value chain in lighting on the topics of Lighting Designers, Lighting System/Service Manufacturers and Distributors, Lighting Components/Modules/Equipment/Service Distributors & Manufacturers, Lighting Organisations, Lighting Events and Lighting Research.

The GLD addresses more than 60,000 experts in the fields of Architecture, Lighting, Design and Industry.

The GLD offers completely new functionalities for Lighting Directories such as: LinkedIn Profiles for Lighting Designers, Reference Projects for Lighting Designers, Up-To-Date Offer-Segmentations for Manufacturers and Distributors and enhanced opportunities for highlighting entries. In addition to the Standard free entry, the GLD offers Premium entries that can include images as well as advertising opportunities and offers the vCard download function. Statements from key people in the lighting domain are published throughout the GLD making it a highly interesting read.

The GLD will be published semi-annually in September and in March. It will be distributed via ISSUU as a Digital Magazine and as a PDF Download Magazine.

C

D The sinuous S-shaped form of the Sackler Crossing appears to hover just above the surface of the lake at the Royal Botanic Gardens of Kew.

Our lighting treatment for the bridge is simple, understated, and in tune with the mercurial nature of the design. It allows the bridge to reflect in the water, and in turn, the water to reflect into the solid bronze uprights that form the balustrade of the bridge.

To achieve the smooth shimmering effect we were after, we created a custom upright that was recessed in the bridge deck at either side, between each bronze upright. These gently illuminate the inner surfaces of the uprights, as well as reflecting light onto both the deck and people crossing the span. Through our careful design, the source visibility is minimized and the fitting itself effectively disappears into its environment.

Terms and Conditions

1. All orders are subject to acceptance by Luger Research e.U. (henceforth also known as the publisher).
2. No conditions other than those set forth in the LED professional Media Kit shall be binding upon Luger Research unless specifically agreed to by Luger Research in writing.
3. Positioning of advertisements is at the sole discretion of the publisher except where a specific position has been agreed to by the publisher in writing or has been purchased in advance.
4. All advertising materials have to be sent complete and in the formats and quality defined in this Media Kit. Luger Research is under no obligation to revise advertising materials not received by the LED professional department by the closing date*. Luger Research is not liable for any publication delay or dissatisfying appearance if the material does not comply with the specification. Luger Research reserves the right not to accept such material for publication.
5. Where no new material arrives by the due date for scheduled advertising, the publisher reserves the right to use the material at hand.
6. Once the order has been confirmed, cancellations or changes in advertising by the advertiser or its agency may be made under the following conditions: For cancellations made 12 weeks or longer before the publication date, 50% of the order amount will be charged. For cancellations made less than 12 weeks before the publication date, the full order amount is due.
7. Luger Research assumes no liability for any errors or omissions in relevant information appearing in advertisements.
8. Luger Research is not liable for any delays in the production or delivery of the publication or product due to any conditions beyond the publisher's control.
9. Luger Research has a non-disclosure policy with its subscribers. For this reason the direct retrieval of contact information is not allowed. All landing pages must be an information page where the reader can decide whether to go forward with his/her contact information or not. The information page is hosted by the advertiser or by Luger Research.
10. Luger Research follows all legal requirements of the EU GDPR legislation. For details please see: www.lugerresearch.com/data-protection
11. In considering Luger Research's publishing advertising (or distributing another product) for the advertiser, the advertiser and its agency, agree to indemnify and defend Luger Research against any and all claims, losses, liabilities, damages and expenses (including attorneys' fees) arising out of Luger Research's printing, publishing or distributing such advertising (or another product) and/or arising from third parties' access to advertiser's site and use of advertiser's products or services.
12. In no event shall the publisher be liable for any consequential, incidental or special damages nor shall its liability for any act, error or omission, whether or not due to its negligence, exceed the price paid to Luger Research for the publication or distribution of such materials.
13. Luger Research reserves the right to hold the advertiser and its agency jointly and severally liable for all monies that are due and payable to Luger Research.
14. Advertising in Luger Research's online products and services is subject to the terms of the applicable online insertion order.
15. All payments are due within thirty (30) days of the invoice date unless otherwise specified. Noncommissionable charges, such as production charges, are not subject to an advertising agency commission. Agency commissions are not payable on invoices which are not paid within (90) days of the date of the invoice. The advertiser shall pay a late charge of 1% per month (12% per year) on all invoices not paid within (30) days of the date of such invoices.
16. Claims in regards to print ads must be made in writing within 8 (eight) weeks of publication. Claims pertaining to online banners must be made in writing within 2 (two) weeks of going live. The publisher is not responsible for any claims made after the above stated time limits.
17. Changes may be made without notice. In case of discrepancies, the current on-line version is valid. For details please see: www.led-professional.com/advertise
18. The brands LED professional, Trends in Lighting, LpS Digital, Global Lighting Directory and SciPiL are owned by Luger Research e.U. – All rights reserved.
19. All prices are NET prices exclusive VAT.

Note:

LpO Banner positions and dimensions are valid for desktop computers. Appearance and size on mobile devices and tablets may differ.
